## Hannah Montana tribute show for kids

**T**HE Nerrina's commitment to offering consistent, top-class entertainment to the community continues and now includes entertaining the kids this school holidays with *The Australian Hannah Montana Tribute Show* performing on Monday, September 20.

Hannah Montana is about Miley Stewart (Miley Cyrus) who turns from an average teenage girl during the day to a famous pop singer at night — Hannah Montana. She then, of course, continuously tries to conceal her identity to everyone but family and close friends.

*The Australian Hannah Montana Tribute Show* has reproduced Hannah Montana's music into a 50-minute, fully costumed and choreographed show with Hannah, three back-up singers/dancers and sets. These four talented Melbourne performers recreate the Hannah Montana experience leaving the audience feeling that dreams really can come true.

Songs includes *Best of Both Worlds, Rockstar, If We Were A Movie, The Other Side Of Me, Life's What You Make It, I Miss You, One In A Million, True Friend, Make Some Noise, Who Said, Bigger Than Us, Girls Night Out, We Got The Party and Old Blue Jeans*.

*The Australian Hannah Montana Tribute Show* can also provide time for photos and autographs with the

# Brotherhood of St Laurence

A wall of FloodSax can be deployed in minutes, meaning this is one of the fastest flood-mitigation tools on the market.

## Brotherhood's rapid response to flooding

**J**EFF Moon the General Manager of Social Enterprises at the Brotherhood of St Laurence and his team assisted flood affected residents over the weekend by providing them with Floodsax. Many residents were caught out by the sudden down pour and were unable to properly prepare their homes.

So what are FloodSax and how can they help to protect your property? FloodSax are sand-less flood bags that are lightweight and expand on contact with water. Their super absorbency enables you to protect your home or business and can be used to form a wall to direct water flow. FloodSax are also 100% biodegradable and all profits are reinvested back into local communities through the Brotherhood of St Laurence.

Mr Moon says: "We have chosen FloodSax as a flood mitigation tool because they empower all Australians to protect their home, business and community against flooding and accidental water damage".

In particular need this weekend were residents in the outer lying areas as well

as the elderly or non able bodied members of the community who were unable to access or fill traditional sandbags. Jeff and his team moved from house to house providing homeowners with bags of Floodsax and quickly explained how easy and convenient they were to deploy.

The emergency services sector as well as the insurance industry, recommend that businesses and individuals prepare a disaster management plan. Andrew Gissing, Director of Emergency Management and Communications at the State Emergency Services (SES) states "the SES encourages all homes and businesses to consider their readiness for floods and storms, including developing an emergency plan to deal with their effects".

A wall of FloodSax can be deployed in minutes, meaning this is one of the fastest flood-mitigation tools on the market. If your home or business could be at risk from floods or water damage, then FloodSax should be an integral part of your disaster management plan.

## The modern sandbag

Your home is prepared for a fire, but is it prepared for a storm?

Control the level of damage caused by extreme weather events such as: Storms, hail, flash flooding and internal water damage from leaking roofs, faulty pipes and appliances. FloodSax are a lightweight, portable alternative to sandbags that expand on contact with water and are available at your local Home Timber and Hardware and Thriftylink stores.

**WHERE CAN I PURCHASE FLOODSAX?**

FloodSax can be purchased from your local Home Hardware or Thriftylink store

The proper hardware store

Nothing's too hard.
